Figure 1 is a schematic cross-sectional view of a substrate 10. The substrate has a top surface 12a, 12b and a bottom surface 21a, 21b. It contains a first region 22a, 22b with a grid of circular features and a second region 33a, 33b with diagonal hatching. Dimensions D and C are indicated.

Fig. 2 is a cross-sectional view of the device. It shows a rectangular structure with a central region containing a grid of small circles (22a, 22b) and a shaded region (33a, 33b). The device is surrounded by a frame (12a, 12b) and has a central core (21a, 21b). Dimensions C and D are indicated.
